

DIGITAL IDENTITY & BIOMETRICS

Really You, Everywhere.

Just Be Yourself. Your identity unlocks your worlds — from a door to an app, from a badge to a dashboard. No passwords. Just you.

Your data stays where it belongs. Sovereign by design, deployed anywhere.

SAAS · BIOMETRICS · IDENTITY · SECURITY · COMPLIANCE · SOVEREIGNTY · CLOUD-MANAGED

ABOUT US

Identity & Security, Reimagined.

Continuum Identity was built on a simple belief: identity and security should create value, not just cost. With over 30 years of combined expertise spanning biometrics, digital identity, SaaS architectures, internet technologies, and data management, we are building a platform where your identity works for you — seamlessly, securely, everywhere.

Headquartered in Paris, our cloud-managed platform combines central intelligence with local execution. Deploy on your own infrastructure, in any country, ensuring full data sovereignty and regulatory compliance wherever your operations are. One platform, your rules, your jurisdiction.

30+

YEARS OF COMBINED
EXPERTISE

CLOUD-MANAGED

ON-PREMISE COMPATIBLE

DEPLOY ANYWHERE

SOVEREIGN BY DESIGN

API

OPEN & INTEROPERABLE

For too long, identity and security have been treated as a necessary expense — complex, rigid, and disconnected. We founded Continuum Identity to prove it can be different: one identity, one platform, deployed anywhere, controlled by you.

Nicolas Garcia
Founder & CEO

OUR SOLUTIONS

One Platform. Multiple Solutions.

 UNIFIED ACCESS

Physical · Logical · Biometric

One identity, every door, every app. Manage physical and logical access from a single platform — biometric-enabled, cloud-managed, and sovereign. From turnstiles to dashboards, access follows the user.

Physical Access

Logical Access

Sovereign Hosting

 TIME & ATTENDANCE

Workforce Management

Accurate, fraud-proof workforce management. Track attendance with biometric precision, automate schedules, and generate compliance-ready reports effortlessly.

Biometric-First

Scheduling

Audit-Ready

 E-KYC

Identity Verification

Streamlined electronic Know Your Customer processes. Verify identities quickly and compliantly with biometric matching and document verification.

Document Check

Face Match

Regulation-Compliant

 VISITORS

Visitor Management

Professional visitor management that enhances security while maintaining a welcoming experience. Pre-register, track, and manage visitors seamlessly.

Pre-registration

Check-in

GDPR-Ready

 COMPLIANCE & AUDIT

Compliance, Reporting & Audit

Built-in compliance tracking, automated reporting, and full audit trails. Meet regulatory requirements across jurisdictions with exportable logs and real-time monitoring.

Audit Trails

Auto-Reporting

Multi-Jurisdiction

 CENTRAL DASHBOARD

Unified Management

One unified view to manage all modules — access, attendance, visitors, identity. Role-based dashboards for operators, managers, and administrators.

Role-Based

Real-Time

Multi-Tenant

WHY CONTINUUM IDENTITY

Built Different. Built to Last.

Hardware Freedom

Choose any hardware, swap anytime. Our platform integrates with leading manufacturers, and our CID-BOX edge device bridges cloud and on-premise seamlessly.

Cloud-Managed, Edge-Ready

Centrally managed from the cloud, locally executed at the edge. Full SaaS, hybrid, or on-premise deployment — your architecture, your choice. The CID-BOX bridges both worlds seamlessly.

Data Sovereignty

Your data stays in your jurisdiction. Local servers, local compliance, global reach. Deploy anywhere in the world with full data residency control — from GDPR in Europe to local regulations in Africa.

Security by Design

End-to-end encryption, biometric data protection, and regulatory compliance are foundational — not afterthoughts. Your identity data is always safe.

Deploy in Days, Scale Forever

No lengthy implementation cycles. Configure, connect, go live. Then scale from one site to hundreds without re-architecting.

API-First Integration

Built for interoperability. Open APIs make it easy to integrate CID into your existing ecosystem, from HR systems to building management platforms.

Built for partners who demand more than a vendor — they want a platform they can trust.

PARTNER WITH US

Your Growth, Our Mission.

We don't just provide software — we provide a business platform. Whether you're an integrator embedding identity into your projects, a reseller expanding your portfolio, or an enterprise securing your operations, CID gives you the technology, the sovereignty, and the support to win.

Integrators

Embed our solutions into your projects with APIs, SDKs, and white-label options.

Full technical enablement and dedicated integration support.

Resellers

Expand your portfolio with cutting-edge identity solutions and competitive margins.

Recurring revenue model with tiered partner pricing.

Enterprises

Tailored solutions for large-scale deployments with dedicated account management.

Custom SLAs, sovereign deployment, and priority roadmap input.

Deploy Anywhere. Stay Sovereign.

Headquartered in Paris. Deployable on local infrastructure in any country. Your data, your jurisdiction, your rules.
